

Westfield Park Nursing Home

Care without compromise

CARE HOME WITH NURSING

Moving to a new home can be worrying but at Westfield Park we aim to provide a safe, active and friendly home for our residents to relax in. With an emphasis on delivering the highest quality care, in our purpose built environment, and providing a choice of stimulating activities, our goal is to make this time of our residents' life as enjoyable and comfortable as possible. All of the 54 large single bedrooms have full ensuite wet rooms, with the majority of the ground floor bedrooms having doors out to their own external patio areas.

PREMIER SUITES

There are 6 premier suites which all have their own kitchenettes and lounge areas, and have been specially designed for couples/siblings but can be used individually also. These create a very independent lifestyle and really are **a home within a home.**

CARE FACILITIES

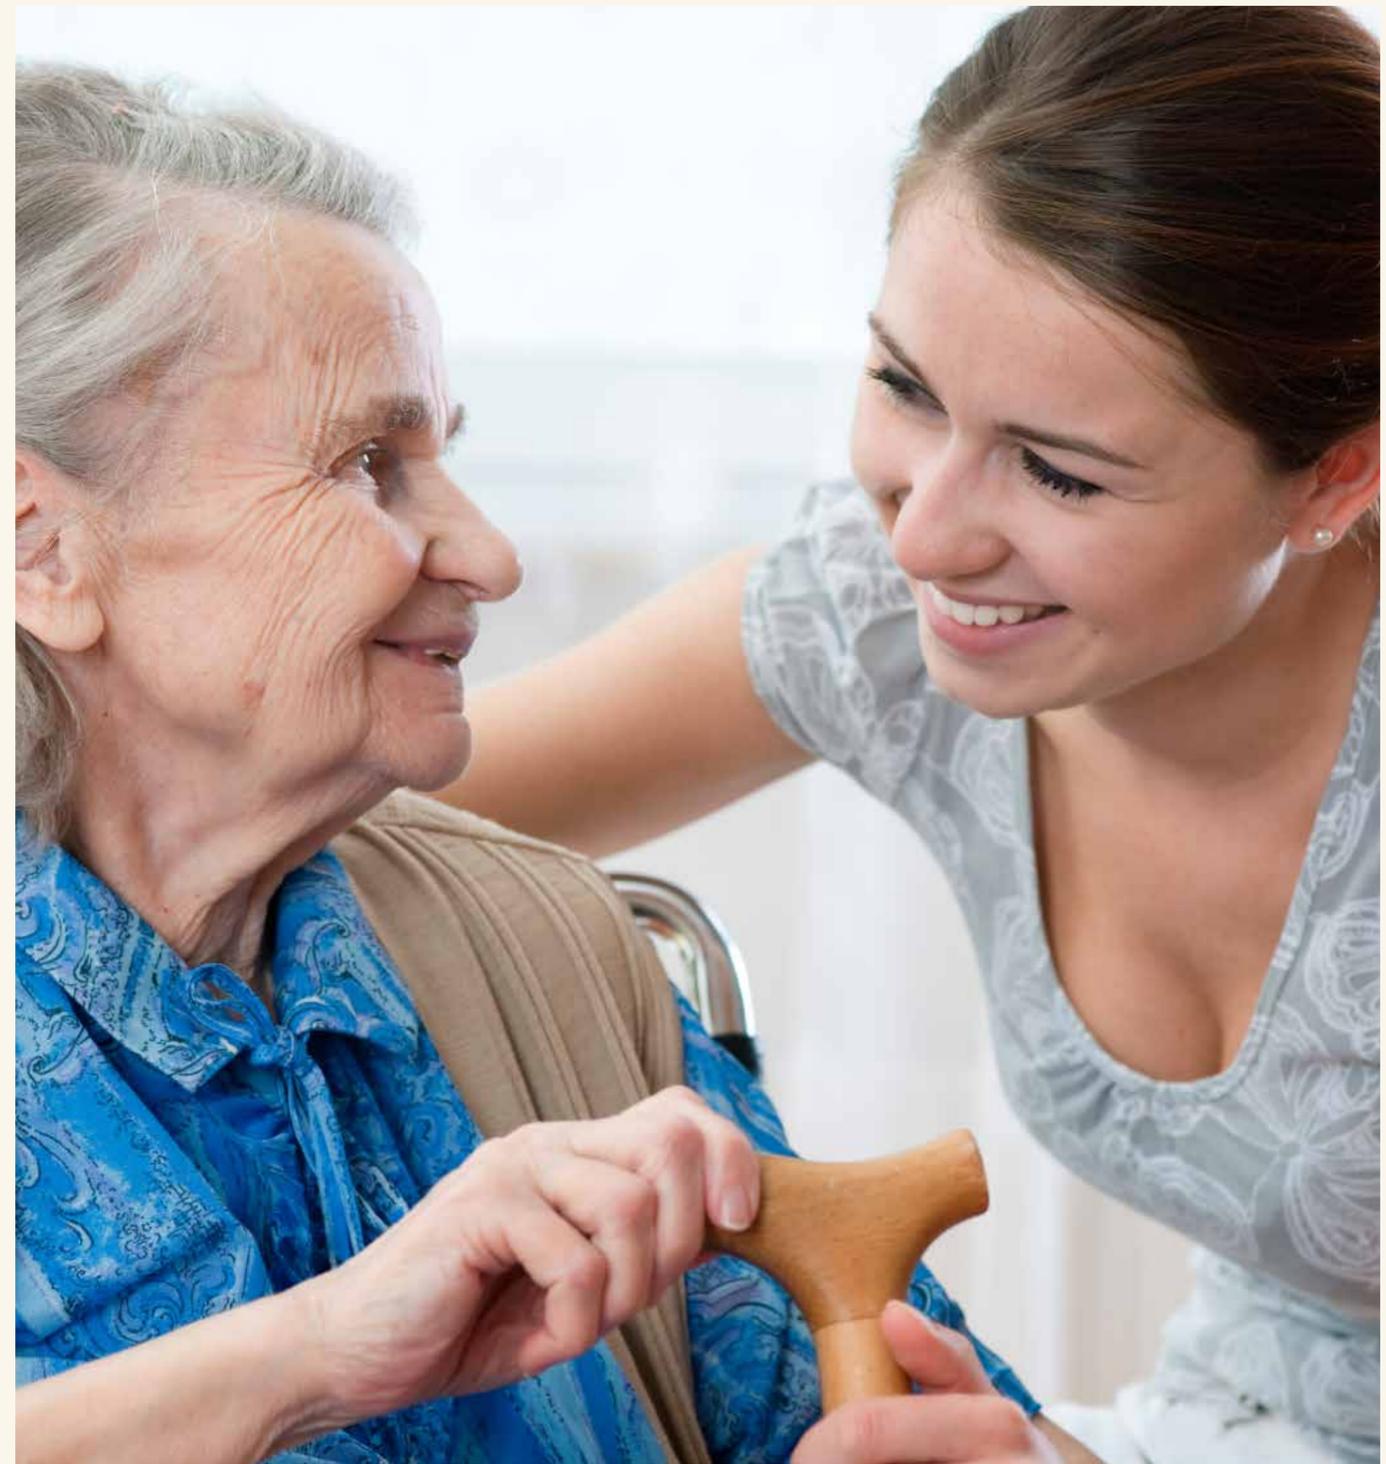

The facilities at the home include an in-house pub called the 'Westfield Arms', a full beauty salon and hairdressing room, an artificial outdoor bowls pitch, a rehabilitation gym, a sweet shop called 'Sweets and Treats', a smoking lounge and an entertainments room which includes a cinema. We have a team of fully trained cooks and kitchen staff using the latest restaurant standard equipment providing healthy, tasty menus, with a choice at every meal. Our menus are regularly reviewed in conjunction with our residents' requests. All Laundry requirements are completed by our housekeeping team. **We feel these facilities will make this chapter of our residents' lives as enjoyable and happy as possible.**

DIGNITY & ACTIVITY

Residents at Westfield Park are provided with a large variety of activities and are encouraged to join in as much as possible. However we also respect people's wishes if they wish to decline. Our in-house activities are provided by a team of activity coordinators and include arts and crafts, dances, pub quizzes, a gardening club and much more. We also organise trips out, to not only the local shops and pubs, but also further afield such as the beach at Bridlington, the aquarium at the Deep in Hull and Castle Howard in York. **By making new friends and starting new social activities, life at Westfield Park is never dull.**

THE CARE TEAM

With 24 hour nursing staff you can feel assured that if you have any issues medical staff are on hand to help. We have a large staff team with high staff to resident ratios who have completed a robust and varied training program to provide the highest quality care. We aim for all our care team to have completed Level 2 training in Health and Social Care and as part of our staff development we actively encourage staff to enhance their skills by completing further training appropriate to both their role and the care needs of those who live with us. We have our own training room and computer stations which allow staff to be trained in an environment that is conducive to learning and is well equipped with all relevant resources.
